

Solar/Mains Power Packs

Custom-made for telecommunications.

Power Packs from Telereach combine efficiency, reliability, practicality and economy to power telecom equipment in critical locations. They work directly from AC mains or a solar panel, and automatically charge built-in batteries that provide the back-up energy.

Special features incorporated are:

Controlled charging for long battery life;

LEDs indicate sources and charge level;

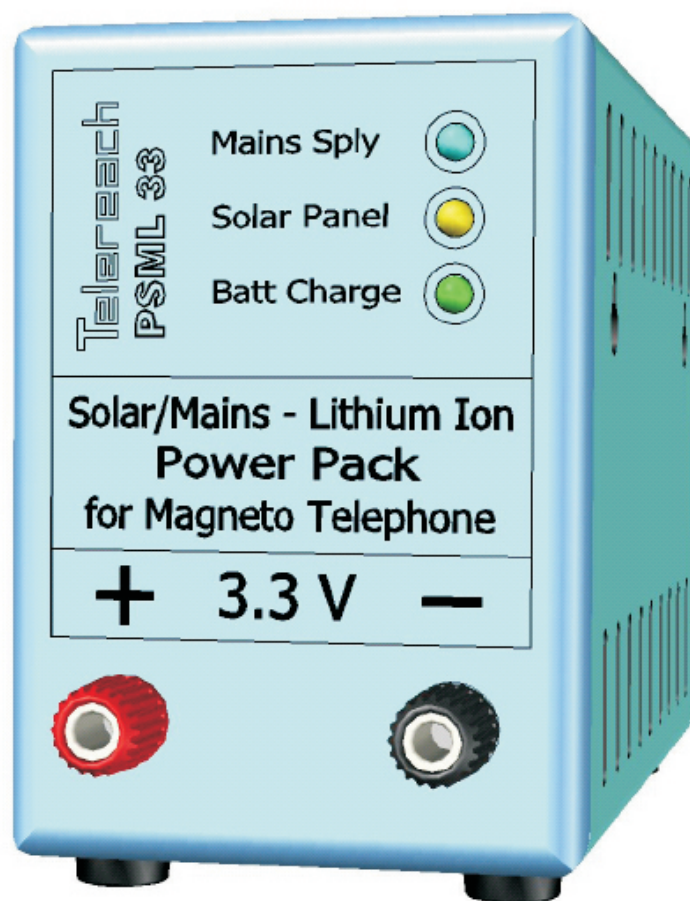

Stable output voltage with low ripple;

Buzzer for output short and low battery;

Direct connection to solar panel;

Funnel grommet for protection of cord;

Heavy duty, compact and durable housing.

Our range of Power Packs for telecom, all working on 100 to 250V AC mains as well as 18 V solar panel:

Model Number	Back-up Battery	Output	Custom made for
PSML 33	3.6V 2.2 AH Lithium Ion	3.3V 100mA	Magneto Telephone
PSM 12	None	12V 500mA	DTMF Equipment Hot-Line Telephone
PSMS 12	12 V 7 AH SMF	12V 500mA	Signal Post Telephone
